Email: ml6@andrew.cmu.edu

EDUCATION	Northeastern University <i>Ph.D., Computer Science</i> Advisors: David Bau & Byron Wallace. Carnegie Mellon University <i>B.S., Statistics & Machine Learning</i> Dean's List with High Honors in all semesters.	2026–Present 2022–2026
PUBLICATIONS	[Link] Michael Li , Nishant Subramani. “ <i>How Much Do Circuits Tell Us? Measuring the Consistency and Specificity of Language Model Circuits</i> ,” Oral presentation at the SciFM Workshop at COLM, 2026. [Link] Michael Li , Nishant Subramani. “ <i>Model Internal Sleuthing: Finding Lexical Identity and Inflectional Features in Modern Language Models</i> ,” ACL, 2026. [Link] Michael Li , Nishant Subramani. “ <i>BERTology in the Modern World</i> ,” INTERPLAY Workshop at COLM, 2025. [Link] Michael Li , Fatemeh Esfahani, Li Xing, Xuekui Zhang. “ <i>Predicting the Daily Counts of COVID-19 Infection Using Temporal Convolutional Networks</i> ,” Journal of Global Health, 2023.	
RESEARCH	Carnegie Mellon University, <i>Language Technologies Institute</i> Mentor: Nishant Subramani Research on interpreting language models, with a focus on understanding how their internal representations relate to model behavior. Carnegie Mellon University, <i>Institute for Strategy & Technology</i> Advisor: Hannah Bailey Developed an embedding-based method for measuring agenda-setting power in U.S. state legislation and political social media. University of Victoria, <i>Department of Mathematics & Statistics</i> Advisor: Xuekui Zhang Developed TCN, CNN, and LSTM forecasting models for U.S. COVID-19 trends using demographic and mobility data.	2025–2026 2025–2026 2022–2023
AWARDS	Best Paper, LTI Student Research Symposium, Preliminary Track 1 st Place, Alameda County Science Fair Presenter, California Science Fair U.S. Open Music Competition Gold Medal, Showcase Piano Senior Division	2026 2021, 2022 2021, 2022 2021, 2022
INTERNSHIPS	Google, <i>Software Engineering Intern</i> Developed data pipelines and trained a GNN autoencoder for anomaly detection on Google's B4 network. Epirus, <i>Machine Learning Intern</i> Developed reinforcement-learning policies for heterogeneous drone swarms. Built a vectorized environment and training pipeline that reduced training time from days to minutes. Beaver Health, <i>Software Engineering Intern</i> Led development of generative-AI dialogue systems for evidence-based dementia interventions and implemented multimodal data and conversation infrastructure.	Summer 2025 Summer 2024 Summer 2023

LEADERSHIP	Carnegie AI Safety Initiative 2024–Present <i>Technical Reading Group Co-Lead</i> Co-lead weekly discussions on RLHF, scalable oversight, mechanistic interpretability, robustness, technical governance, and AI control.
PROJECTS	CLaiM, <i>Cal Hacks 11.0</i> Hyperbolic Prize (\$1,000) Automated natural-disaster insurance-claim processing using SAM 2 and YOLOv8. Shipworthy, <i>HackItShipIt</i> 1st Place Used OpenCV to turn a physical steering wheel into a real-time controller for a Unity sailing game. Stance, <i>Data Day Grind</i> Best Visualization Built and interpreted toxic-comment classifiers using scikit-learn and LIME. Ad Lunam, <i>To the Moon and Hack</i> 3rd Place Developed a virtual-reality physics simulation with procedurally generated planets in Unity.
